

Red Zone Danger Area Warning Light

40% of all forklift accidents involve a pedestrian. Ensure pedestrians stay a safe distance away from the forklift with the Red Zone Danger Area Warning Light. The Red Zone puts a bright red line on the floor to keep pedestrians away. This zone can also be called the HALO ZONE and can be adjusted to the distance of your choice. This helps prevent foot injuries and collisions from rear end swing, as well as, showing the NO GO AREA around any piece of mobile equipment. The Red Zone is mounted on the sides of the forklift and can also be mounted on the rear and/or front to create a complete zone. Each side of the forklift you want to protect will require one Red Zone light. The Red Zone can also be combined with our advanced warning [Forklift Blue Spot Lights](#), to create a complete pedestrian safety system for your facility. Distributed in North America by Forklift Training Systems. Now UL rated for EE and LPS forklifts!

- Powered by the forklift.
- Operating voltage 9-64 Volts DC
- Current draw at 13.5V is 1.39 amps
- Fast and easy installation, no tools needed
- Includes mounting bracket and wiring.
- Compact size 6" x 2.25" x 2.75"
- Lifetime warranty 100,000 hour rated life
- Three 6 watt LED's, 1,200 lumens
- PC lens material and aluminum body
- IP67 rated, fully weatherproof
- -40 to 250F temperature rated
